**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 21 February 2002.  
 2a) This action is FINAL.                    2b) This action is non-final.  
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Drawings***

1. The drawings filed on 28 May 2002 are acceptable subject to correction of the informalities indicated on the attached "Notice of Draftsperson's Patent Drawing Review," PTO-948. In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.

## **INFORMATION ON HOW TO EFFECT DRAWING CHANGES**

### **Replacement Drawing Sheets**

Drawing changes must be made by presenting replacement sheets which incorporate the desired changes and which comply with 37 CFR 1.84. An explanation of the changes made must be presented either in the drawing amendments section, or remarks, section of the amendment paper. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). A replacement sheet must include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of the amended drawing(s) must not be labeled as "amended." If the changes to the drawing figure(s) are not accepted by the examiner, applicant will be notified of any required corrective action in the next Office action. No further drawing submission will be required, unless applicant is notified.

Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and within the top margin.

### **Annotated Drawing Sheets**

A marked-up copy of any amended drawing figure, including annotations indicating the changes made, may be submitted or required by the examiner. The annotated drawing sheet(s) must be clearly labeled as "Annotated Sheet" and must be presented in the amendment or remarks section that explains the change(s) to the drawings.

Art Unit: 3639

**Timing of Corrections**

Applicant is required to submit acceptable corrected drawings within the time period set in the Office action. See 37 CFR 1.85(a). Failure to take corrective action within the set period will result in ABANDONMENT of the application.

If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings MUST be filed within the THREE MONTH shortened statutory period set for reply in the "Notice of Allowability." Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136 for filing the corrected drawings after the mailing of a Notice of Allowability.

***Specification***

2. The disclosure is objected to because of the following informalities: the drawings filed on 28 May 2002 included three new figures, which all lack descriptions within the specification. Appropriate correction is required.

3. The disclosure is objected to because of the following informalities: the U.S. Patent Application nos. that the applicant refers to on page 15 and 16 of the disclosure are omitted. Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3639

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-4, 8 and 9 are rejected under 35 U.S.C. 102(e) as being anticipated by

Bornemann et al., U.S. Patent No. 6,199,752 B1.

As per Claim 1, Bornemann et al. discloses a franking machine comprising:

- a circuit board located internal to the machine (Col. 3, lines 37-45); and
- at least a first removable module electronically engageable with said circuit board, said first module including a flash memory (Col. 3, lines 37-45; Col. 4, lines 24-29).

As per Claim 2, Bornemann et al. discloses a machine wherein said memory has postal rate information stored therein (Col. 8, lines 40-55).

As per Claim 3, Bornemann et al. discloses a machine wherein said memory can be easily plugged into a computer (Col. 3, lines 27-30).

As per Claim 4, Bornemann et al. discloses a machine wherein said memory includes application software stored therein (Col. 8, lin3w 40-55).

As per Claim 8, Bornemann et al. discloses a machine comprising:

- a second removable module electronically engageable with said circuit board (Col. 3; lines 37-45; Col. 5, lines 26-31).

As per **Claim 9**, Bornemann et al. discloses a machine wherein the second removable module includes application software stored therein (Col. 5, lines 26-31).

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. **Claims 5-7 and 10** are rejected under 35 U.S.C. 103(a) as being unpatentable over Bornemann et al., U.S. Patent No. 6,199,752 B1 in view of Lee et al., U.S. Patent No. 5,590,198.

As per **Claim 5 and 10**, Bornemann et al. discloses all of the limitations of claim 1.

Bornemann et al. discloses a franking machine comprising a flash memory storing postal rate information (Col. 8, lines 40-55). Bornemann et al. fails to disclose a machine comprising RAM. However, Lee et al. teaches a franking machine comprising random access memory (RAM) and read only memory (ROM) (Col. 5, lines 13-17; see also Figure 2). Therefore, it would have been obvious to one of ordinary skill in the art at the time of applicant's invention to modify the franking machine of Bornemann et al. because it greatly improves the efficiency of the system by allowing data to be quickly accessed by the system's processor.

As per Claims 6 and 7, Bornemann et al. discloses all of the limitations of claim 1.

Bornemann et al. fails to disclose a machine comprising a removable PSD. However, Lee et al. teaches a removable electronic vault (PSD) (Col. 2, lines 56-65; Col. 3, lines 58-65; Col. 4, lines 16-18). Therefore, it would have been obvious to one of ordinary skill in the art at the time of applicant's invention to modify the franking machine of Bornemann et al. and include a removable PSD as taught by Lee et al. because it greatly improves the convenience of the system by providing the user with an easily replaceable PSD.

### *Conclusion*

Examiner's Note: Examiner has cited particular columns and line numbers in the references as applied to the claims below for the convenience of the applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested that the applicant, in preparing the responses, fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fadey S. Jabr whose telephone number is (571) 272-1516. The examiner can normally be reached on Mon. - Fri. 7:30am to 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Hayes can be reached on (571) 272-6708. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
